THE MOON *and beyond*

Bright, new horizons await today's students . . . new technologies . . . new advancements on all fronts . . . even the moon and whatever lies beyond.

How far you go in this space age depends partly on your imagination but primarily on your education and training. Conquering new horizons will demand more of today's graduates—more knowledge, more skills, more training and more specialization.

Our Free Enterprise system, with its high living standards, gives you an opportunity to "shoot for the moon" in any field. Whether or not your target is reached depends on how well trained you are to launch your career.
